Series 2380

Programmable DC Electronic Loads

- 200W, 250W, and 750W models
- Supports up to 500V or 60A
- Constant current (CC),constant voltage (CV), constant resistance (CR), and constant power (CP) operating modes
- LED simulated load test mode
- Readback voltage and current resolution down to 0.1mV/0.01mA
- Dynamic mode with cycle rate up to 25kHz
- Voltage rise and fall time measurement
- Current monitor function
- List mode
- Battery test mode
- Built-in GPIB,USB, and RS-232 interfaces

Series 2380 programmable DC electronic loads can sink a wide range of voltages and currents. The 200W Model 2380-500-15 can accept up to 500V or 15A. The 250W Model 2380-120-60 can accept up to 120V or 60A. The 750W Model 2380- 500 30 can accept up to 500V or 30A. These single-output, stand-alone electronic loads are cost-effective and self-contained.

Multiple Operating Modes

These DC electronic loads can operate in constant current (CC), constant voltage (CV), constant resistance (CR), or constant power (CP) mode. They can also be configured to provide a dynamically changing load to the DC source with load switching times as fast as 25kHz. Versatile internal, external, and remote triggering options allow synchronizing the dynamic load behavior with other events.

Comprehensive Protection

Protection functions built into Series 2380 DC electronic loads ensure the reliability and safety of all tests. These functions include over temperature protection (OTP), over voltage protection (OVP), over current protection (OCP), over power protection (OPP), and local/remote reverse voltage (LRV/RRV) protection. A power-on system self-test ensures the instrument is operating properly.

Full Complement of Settings and Controls

To maximize testing efficiency, you can save test parameters into any one of 100 memory locations for quick recall. All load parameters, such as voltage, current, slew rate, and dynamic mode time intervals, can be set using the front panel controls or programmed remotely. A numeric keypad and rotary knob allow entering settings quickly and setting parameters to their full resolution easily. USB-TMC, GPIB and RS-232 interfaces are built in for remote control and communication. A current monitor interface simplifies monitoring input current waveforms by providing a connection for an oscilloscope.

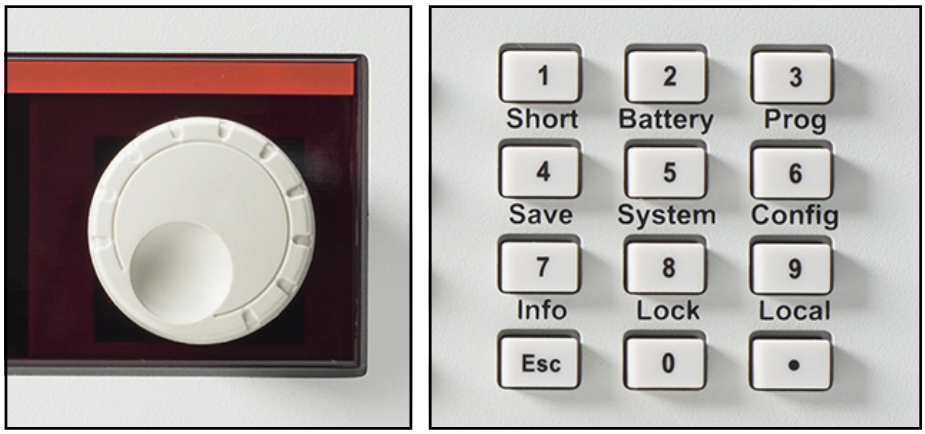

Figure 1. Use either the rotary knob or the keypad to quickly enter settings and set parameter values using all the available resolution.

NOTES*

1. The voltage/current input is no less than 10% FS (FS indicates the full scale). Accuracy is defined as: % of reading + % of full scale.
2. The range of read-back resistance is between (1/(1/R + (1/R)*0.01% + 0.08)Ω and 1/(1/R–(1/R)*0.01%–0.08))Ω.
3. The voltage/current input is no less than 10% FS.
4. Ascending/descending slope: 10%–90% current ascending slope from 0 to maximum current.
5. Minimum rise time: 10%–90% current rise time.

General

Memory Capacity: 100 sets of measurements and selectable parameters.

Signal Connections:

Front Panel: Input: Stud and threaded knob terminals for lug connectors (200W and 250W versions).

Rear Panel:

Input: Terrminal Bars (750W version).

Current Monitor Output: BNC.

Remote Sense, Analog Input, External Trigger, Voltage Fault: 9-pin terminal block.

Communications:

USB: USB2.0 device, type B, USB-TMC compliant.

RS-232: DB-9 connector.

GPIB: IEEE-488.2 compliant.

Cooling Method: Fan.

Fan Speed vs. Internal temperature:

Temperature	40°C	50°C	70°C	85°C
Fan status	First gear	Second gear	Third gear	Temperature protection (OH) and load is shut off.

Power Source:

AC Input: Switchable between 120VAC nominal and 240VAC nominal.

"J" versions: 100VAC, nominal.

Frequency: 50/60Hz.

Power Consumption:

2380-500-15: 40VA.

2380-120-60: 40VA.

2380-500-30: 150VA.

EMC: Conforms to European Union EMC Directive.

Safety:

Canadian Certification: CSA listed to UL Std. No. 61010-1(3rd Edition) and Can/CSA-C22.2 No. 61010-1-12.

European Union Compliance: Conforms to European Union Low Voltage Directive.

Environment:

Altitude: Operating: 2000m, (6562 ft) above sea level.

Temperature and Relative Humidity:

Operating: 0° to 40°C full accuracy with 80% relative humidity at up to 35°C, non-condensing.

Storage: –20° to 70°C, 10% to 85% relative humidity up to 40°C, 5% to 60% relative humidity above 40°C.

Net Weight:

200W/250W Model: 4.65kg.

750W Model: 24.95kg.

Shipping Weight:

200W/250W Model: 7kg.

750W Model: 31.75kg.

Recommended calibration frequency: 1 time/year.

Warranty: 3 years.
