

Military Communications

IFR RCTS-003 Radio Test Set

The IFR RCTS-003 provides "State of the Art" capabilities for semi-automated testing of Life Support communications

IFR RCTS-003 Radio Test Systems

The RCTS-003 Radio Test System is made up of the general purpose FM/AM-1600 (TS-4317) Communication Test Set in association with the J-1601A (J-4843A) Generic Applique Housing with RPM-003. The RCTS-003 Radio Test System is the self-contained, transportable, semi-automated Test System that is being fielded for use by the US Armed Forces for operational verification testing and/or repairs of Life Support Radio Systems. Full functional testing of all operational modes are available: single channel voice, beacon and DME Transponder testing. All Life Support LRUs listed below can be verified, tested and repaired when used in conjunction with the Maintenance Group (Cables, Repair Manuals, Special Tools, etc.) supplied by Aeroflex.
